

The screenshot displays the IBM Cognos Analytics interface. The top navigation bar includes the IBM logo, a search bar, and a 'New exploration' button. The left sidebar shows the 'Selected sources' section with '50_Startups.csv' and a search bar. The main content area features a 'Profit' visualization, which is a horizontal bar chart showing predictive strength. Below this, a table titled 'Profit by R&D Spend (Group) and Marketing Spend (Group)' is displayed, showing profit values for different groups. The right sidebar contains the 'Fields' section, which includes a 'Target' field and a 'Local filters' section.

Profit Visualization:

The 'Profit' visualization is a horizontal bar chart showing predictive strength. The x-axis is labeled 'Predictive strength' and ranges from 0 to 100. There are several data points represented by colored circles and triangles along the axis.

Profit by R&D Spend (Group) and Marketing Spend (Group)

Profit (Average)

R&D Spend (Group)	Marketing Spend (Group)	Profit (Average)
78630.683 to < 157261.367	235892.050 to < 314522.733	393153.417 ...
is than 78630.683	157261.367 to < 235892.050	314522.733 to < 393153.417
